

Project Overview

July 19, 2013

THE CITY OF
COLUMBUS
MICHAEL B. COLEMAN, MAYOR

DEPARTMENT OF
PUBLIC SERVICE

Twin Rivers Drive Improvements

The city of Columbus has completed plans for improving **Twin Rivers Drive between Goodale Boulevard and Dublin Road/US-33**. The project will upgrade road conditions, add pedestrian and bicycle facilities and improve safety and drainage. Plans include:

- Reconstructing roadway
- Building sidewalks on west side of Twin Rivers Drive
- Constructing new curbs and *Americans with Disabilities Act*-compliant curb ramps
- Repairing stormwater inlets
- Installing bicycle sharrows and signage

The features above will be built simultaneously with spot improvements to the existing Scioto Trail shared-use path on the south side of Dublin Road. The additions will connect the Scioto Trail to the current shared-use path alongside Olentangy River Road and north of Goodale Blvd.

Construction is scheduled to begin the week of August 5 and finish in late October 2013, weather permitting.

Detour:

Traffic on Twin Rivers Drive will be one-way southbound during construction. Northbound traffic will be detoured westward on Dublin Road to turn right on Grandview Avenue, right on Goodale Boulevard then right on Twin Rivers Drive.

Questions regarding project information and schedule may be directed to City of Columbus:

Construction Manager: Steven Wasosky, P.E., tel. 645-3183
